SKILLS

- Graphic design.
- AI and digital transformation.
- Web Design.
- IOT and Arduino Uno Circuit Board.
- Knowledgeable in AR Augmented Reality.

PROJECTS

Artificial Pancreas Simulation with Arduino Uno

I used Arduino Uno Circuit Board, wiring, DC pump, normal water and desalinated water to simulate pancreas function by increasing water connectivity and mixing it with desalinated water instead on Insulin. The project has won a prize in my school science fair.

Design blind stack with Arduino Uno

I used Arduino Uno Circuit Board, wiring, DC light, sound bazar and ultrasound sensors to detect obstacles in the way of the blind person to ward with sound and light. The project has won a prize in my school science fair.

Design of New Brands Logo

I designed so many logos for new brands and for T-shirts using adobe illustrator and photoshop.

Design Web Pages

I designed so many web pages using HTML and CSS.

Create YouTube channels

I designed and created my YouTube channel and design related banners and provide some educational contents.

EDUCATION

C++ level 1 certified course
DATES: MAY 2024

Design Graphic Diploma
DATES: JANUARY 2022

Student in Grade 12 American Diploma
DATES: SEPT 2024
LIVERPOOL INTERNATIONAL SCHOOL EGYPT
